Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30,32,34, and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tokunaga (U.S. Patent No. 5,168,281) in view of Hemingway (U.S. Patent No. 5,119,072).

Tokunaga shows in figures 1-4 a device comprising an elongated and disposable flexible strap (2,4) having a fastening opening in one of the ends (see figure 3, the screws 14 extends through holes in the portion 4 of the band) , securement means (1,14) incorporating a fastening element (14) engageable with the fastening opening, a receiver (11) within the securement means, an antenna (3) carried on the strap, and coupling means (5,12) for operatively and removably connecting the antenna with the receiver when the securement means is connected to the strap, and for disconnecting the antenna from the receiver when the securement means is disconnected from the strap. The securement means with the receiver carried thereby having the fastening element removable from the fastening opening prior to disposal of the strap, and being adapted for subsequent assembly and re-use with a replacement strap. Tokunaga does not disclose making the receiver in the form of a radio frequency identification circuit. Tokunaga discloses in column 3, lines 39-41 the idea of making the receiver circuit in the form of a transmitting circuit. Hemingway shows in figures 3-5 the idea of placing a radio frequency circuit (see figure 5) within a wrist carried device. In view of the teachings of Hemingway it

Art Unit: 3611

would have been obvious to one in the art to modify Tokunaga by replacing the circuit with a radio frequency circuit since this would allow information to be conveyed from the device to a distant receiver for security purposes, see Hemingway, column 1, lines 32-56. In regard to claim 32, Tokunaga shows in figure 1 that the receiver circuit (11) is located within the securement means (1). In regard to claims 34 and 38, the screw (14) is considered to be the boss and the portion (4) of the strap extends within an opening (see figure 1, the opening between the right most cover 8 and right most projection of the upper portion of 1 into which portion 4 extends) of the securement means for slide-fit passage of the strap end (4).

Response to Arguments

Applicant's arguments with respect to claims 30,32,34, and 38 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 41,43, and 44 are allowed.

Claims 35-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3611

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
